What changes did you make to improve your UI?

Carried by standing water / We collide with shoulder and steel / Sundered from your spirit lays your body / The sense of touch reminds me that it's real / And from within you, I hear a whimper / A voice echoes in an empty form / Inside my head, you say, "I told you so" / We should've left before the storm / A tear in the fabric of life.

- Button now has clickable animation and has white background removed
- Band image changes to previous album "A different shade of blue"
- Chapter 2 audio was fixed the source from the original audio on youtube was changed and that fixed the problem
- The hover effect is readded to all images once the button is clicked
